

Sketch: Review the lean canvas for this project. Create an initial sketch that captures the desired components for the application. The goal in this iteration is to simply get your ideas onto the page.

Prioritize: Users have limited attention. Assign the page we are wireframing with 20 points allocated for user attention. Each element added to the page costs one point. If you want the user to pay more attention to a particular item, then give it more user attention points.

Ideation

- 1. _____
- 2. _____
- 3. _____
- 4. _____
- 5. _____
- 6. _____
- 7. _____
- 8. _____

List the data requirements for each component:

- 1. _____
- 2. _____
- 3. _____
- 4. _____
- 5. _____
- 6. _____
- 7. _____
- 8. _____

List the tasks required to furnish the data for each component:

- 1. _____
- 2. _____
- 3. _____
- 4. _____
- 5. _____
- 6. _____
- 7. _____
- 8. _____

Ideation

Create some more iterations of your primary view and experiment with varying approaches.
